

Number	R&D Achievement Name	Applicable Industry	Contact Person	Extension
B001	Low-Level Radioactive High Integrity Concrete Container	Nuclear Industry	Chang, Ching-Tu	5992
B002	A Method for Processing Spent Ion-Exchange Resins	Nuclear Industry/Non-Nuclear Industry of Waste Ion-Exchange Resin Stabilization	Shen,Chin-Chang	5804
B003	Preparation of High-Efficiency Inorganic Adsorbent	Nuclear Energy Industry/Traditional Industry/ Petrochemical Industry/ Semiconductor Industry.	Chung, Jen-Chren	5818
B004	The Removal of Radioactive Nuclides and Heavy Metal Contaminants from Water	Environment and Energy	Huang, Chun-Ping	3725
B005	Treatment technique of strong acid and alkali high activity radioactive waste	Nuclear energy industry / Waste stabilization in non-nuclear industries	Hu, Chang-Liang	5615
B006	INER-LRW-C1 Low Level Radioactive Waste Container	Nuclear energy industry	Kuei-Jen Cheng	3640
B007	Separation method of anion and cation exchange resins from mixed ion exchange resins beads.	Nuclear energy industry	Huang, Chun-Ping	3725
